
Integrations and Solutions

- **SD-WAN Design**

- Consolidated SD-WAN Design Guide
 - Introduction to SD-WAN Design
 - SD-WAN Headend Design Guidelines
 - Branch Deployment Options
 - LTE Transport Modes
 - SD-WAN Overlay Networks
 - SD-WAN Topologies
 - VOS Edge Device Direct Internet Access
 - SD-WAN Gateway Use Cases
 - SD-WAN Traffic Optimization
 - VOS Edge Routing Protocols
-

- **Integrations**

- SIEM
 - Unified Endpoint Management
 - Endpoint Detection and Response
 - Identity
 - SSE Integrations
-

- **Versa Secure SD-WAN-SSE Deployment**

- SD-WAN–SSE Hub Integration
-

- **System Hardening**

- Perform Manual Hardening for Versa Analytics
 - Perform Manual Hardening for Versa Branches, Controllers, and Hubs
 - Perform Manual Hardening for Versa Director
-

- **SSE Use Cases**

- DLP Configuration
 - Migrating VOS Appliances Between Headends Using Concerto
 - Step-By-Step Configuration: Authentication Profiles on SSE Gateways
 - Step-By-Step Configuration: Endpoint Identity Profile (EIP)
 - Step-By-Step Configuration: MDM/UEM
 - Step-By-Step Configuration: Versa Secure Internet Access (VSIA)
 - Step-By-Step Configuration: Versa Secure Private Access (VSPA)
 - Step-By-Step Configuration: VSPA and VSIA
 - Versa Gateway-Assisted Trusted Network Detection (TND)
 - Versa SASE Gateway Integration with AWS Cloud
 - Versa SASE Gateway Integration with Azure Cloud
-

- **Versa Integrated Web Application Firewall**

- Versa Integrated Web Application Firewall
-
