SUPPLEMENTARY INFORMATION:

I. Abstract

This collection of information covers the submission of issue fee payments, requests for certificates of correction, and reissue patent applications to the USPTO.

Issue Fee Payments

The USPTO is required by 35 U.S.C. 131 and 151 to examine patent applications and, when appropriate, allow patent applications and issue them as patents. When an application for a patent is allowed by the USPTO, the USPTO issues a notice of allowance and the applicant must pay the specified issue fee within three months to avoid abandonment of the application. If the appropriate fees are paid within the proper time period, the USPTO can then issue the patent. The rules outlining the procedure or payment of the issue fee and issuance of a patent are found at 37 CFR 1.18, 1.311, and 1.314.

Requests for Certificates of Correction and Reissue Patent Applications

This collection of information also covers several transactions that may be taken after the issuance of a patent. Pursuant to 35 U.S.C. 254 and 255, a certificate of correction may be requested to correct an error or errors of an issued patent. If the USPTO determines that the request should be approved, the USPTO will issue a certificate of correction.

For an original patent that is believed to be wholly or partly inoperative or invalid, the original patentee, or the current patent owner if there has been a subsequent assignment, may apply for the reissue of the patent pursuant to 35 U.S.C. 251. The reissue patent application process requires, among other items, an oath or declaration specifically identifying at least one error being relied upon as the basis for reissue

and stating the reason for the belief that the original patent is wholly or partly inoperative or invalid (e.g., a defective specification or drawing, or claiming more or less than the patentee had the right to claim in the patent). The rules outlining reissue application procedures are found at 37 CFR 1.171–1.173 and 1.175–1.178.

II. Method of Collection

The USPTO prefers that the items in this information collection be submitted electronically via the USPTO patent electronic filing system (Patent Center). Respondents may also submit the information in paper form by mail, or by hand delivery to the USPTO.

Postage Costs

While the USPTO prefers that the items in this information collection be submitted electronically, responses may be submitted by mail through the United States Postal Service. The USPTO estimates that 0.50% of the 473,710 items will be submitted in the mail, resulting in 2,369 mailed items. The USPTO estimates that the average postage cost for a mailed submission, using a Priority Mail legal flat rate envelope, is \$10.40. Therefore, the USPTO estimates the total mailing costs for this information collection at \$24,638.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be aware that the entire comment—including PII—may be made publicly available at any time. While you may ask in a comment to withhold

PII from public view, the USPTO cannot guarantee that it will be able to do so.
