About US

Zamil Plastic is one of the market leaders in plastic conversion founded in 1980 under Zamil Group umbrella with a clear vision to be a pioneer in the industry by utilizing technology, innovation and international joint venture as solid foundations toward success.

Throughout that period and having this vision in mind, we managed to have a diversified portfolio covering products from automotive, construction and engineering both dynamic and static plastic parts without indeed losing the track on our main product category of heavy-duty packaging. This rich portfolio and strong expertise enabled us to introduce the Food thin wall packaging (IML) and taking the lead in a very short time serving as a HUB of supply to local market in Saudi Arabia, GCC, MENA, Europe and Far East.

During our 40+ years of experience we were able to engrave our name in plastic manufacturing field and we were the first to adapt many new patents and advance technologies to enrich our mastery and provide the best services to our partners. With the best qualifications and following the latest Quality and Food safety standards, we will maintain our success and look forward for mutual prosperity with our partners.

At Zamil Plastic please always remember.. We are delivering solutions, not products.
